JAVA EXAMPLES - USE OF ENUM & SWITCH STATEMENT

 Copyright © tutorialspoint.com

Problem Description:

How to use enum & switch statement ?

Solution:

This example displays how to check which enum member is selected using Switch statements.

```
enum Car {
   lamborghini,tata,audi,fiat,honda
}
public class Main {
   public static void main(String args[]){
      Car c;
      c = Car.tata;
      switch(c) {
         case lamborghini:
         System.out.println("You choose lamborghini!");
         break;
         case tata:
         System.out.println("You choose tata!");
         break;
         case audi:
         System.out.println("You choose audi!");
         break;
         case fiat:
         System.out.println("You choose fiat!");
         break;
         case honda:
         System.out.println("You choose honda!");
         break;
         default:
         System.out.println("I don't know your car.");
         break;
      }
   }
}
```

Result:

The above code sample will produce the following result.

```
You choose tata!
```
