This section presents you various set of Mock Tests related to **Javascript Framework**. You can download these sample mock tests at your local machine and solve offline at your convenience. Every mock test is supplied with a mock test key to let you verify the final score and grade yourself.

## JAVASCRIPT MOCK TEST III

**Q 1 - Which of the following function of String object returns the index within the calling String object of the first occurrence of the specified value?**

- A - substr
- B - search
- C - lastIndexOf
- D - indexOf

**Q 2 - Which of the following function of String object returns the index within the calling String object of the last occurrence of the specified value?**

- A - lastIndexOf
- B - search
- C - substr
- D - indexOf

**Q 3 - Which of the following function of String object returns a number indicating whether a reference string comes before or after or is the same as the given string in sort order?**

- A - localeCompare
- B - search
- C - substr
- D - concat

**Q 4 - Which of the following function of String object is used to match a regular**

**expression against a string?**

- A - concat
- B - match
- C - search
- D - replace

**Q 5 - Which of the following function of String object is used to find a match between a regular expression and a string, and to replace the matched substring with a new substring?**

- A - concat
- B - match
- C - replace
- D - search

**Q 6 - Which of the following function of String object executes the search for a match between a regular expression and a specified string?**

- A - concat
- B - match
- C - replace
- D - search

**Q 7 - Which of the following function of String object extracts a section of a string and returns a new string?**

- A - slice
- B - split
- C - replace
- D - search

**Q 8 - Which of the following function of String object splits a String object into an array of strings by separating the string into substrings?**

- A - slice
- B - split
- C - replace
- D - search

**Q 9 - Which of the following function of String object returns the characters in a string beginning at the specified location through the specified number of characters?**

- A - slice

- B - split
- C - substr
- D - search

**Q 10 - Which of the following function of String object returns the characters in a string between two indexes into the string?**

- A - slice
- B - split
- C - substr
- D - substring

**Q 11 - Which of the following function of String object returns the calling string value converted to lower case while respecting the current locale?**

- A - toLocaleLowerCase
- B - toLowerCase
- C - toString
- D - substring

**Q 12 - Which of the following function of String object returns the calling string value converted to lower case?**

- A - toLocaleLowerCase
- B - toLowerCase
- C - toString
- D - substring

**Q 13 - Which of the following function of String object returns the calling string value converted to upper case while respecting the current locale?**

- A - toLocaleUpperCase
- B - toUpperCase
- C - toString
- D - substring

**Q 14 - Which of the following function of String object returns the calling string value converted to upper case?**

- A - toLocaleUpperCase
- B - toUpperCase
- C - toString

D - substring

**Q 15 - Which of the following function of String object returns a string representing the specified object?**

A - toLocaleUpperCase

B - toUpperCase

C - toString

D - substring

**Q 16 - Which of the following function of String object returns the primitive value of the specified object.**

A - toLocaleUpperCase

B - toUpperCase

C - toString

D - valueOf

**Q 17 - Which of the following function of String object creates an HTML anchor that is used as a hypertext target?**

A - anchor

B - link

C - blink

D - big

**Q 18 - Which of the following function of String object creates a string to be displayed in a big font as if it were in a <big> tag?**

A - anchor

B - big

C - blink

D - italics

**Q 19 - Which of the following function of String object creates a string to blink as if it were in a <blink> tag?**

A - anchor

B - big

C - blink

D - italics

**Q 20 - Which of the following function of String object creates a string to be displayed as bold as if it were in a <b> tag?**

- A - anchor
- B - big
- C - blink
- D - bold

**Q 21 - Which of the following function of String object causes a string to be displayed in fixed-pitch font as if it were in a <tt> tag?**

- A - fixed
- B - big
- C - blink
- D - bold

**Q 22 - Which of the following function of String object causes a string to be displayed in the specified color as if it were in a <font color='color'> tag?**

- A - fixed
- B - fontcolor
- C - blink
- D - bold

**Q 23 - Which of the following function of String object causes a string to be displayed in the specified size as if it were in a <font size = 'size'> tag?**

- A - fixed
- B - fontcolor
- C - fontsize
- D - bold

**Q 24 - Which of the following function of String object causes a string to be italic, as if it were in an <i> tag?**

- A - fixed
- B - fontcolor
- C - fontsize
- D - italics

**Q 25 - Which of the following function of String object creates an HTML hypertext link that requests another URL?**

A - link  
B - sub  
C - sup  
D - small

## ANSWER SHEET

Question Number	Answer Key
1	D
2	A
3	A
4	B
5	C
6	D
7	A
8	B
9	C
10	D
11	A
12	B
13	A
14	B
