AJAX cannot work independently. It is used in combination with other technologies to create interactive webpages.

## JavaScript

- Loosely typed scripting language.
- JavaScript function is called when an event occurs in a page.
- Glue for the whole AJAX operation.

## DOM

- API for accessing and manipulating structured documents.
- Represents the structure of XML and HTML documents.

## CSS

- Allows for a clear separation of the presentation style from the content and may be changed programmatically by JavaScript.

## XMLHttpRequest

- JavaScript object that performs asynchronous interaction with the server.
