Cascading Style Sheets (CSS) is a style sheet language used for describing the look and formatting of a document written in a markup language. CSS3 is a latest standard of CSS earlier versions (CSS2). The main difference between CSS2 and CSS3 is as follows:

- Media Queries
- Namespaces
- Selectors Level 3
- Color

CSS3 modules

CSS3 is a collaboration of CSS2 specifications and new specifications, we can call this collaboration a **module**. Some of the modules are shown below:

- Selectors
- Box Model
- Backgrounds
- Image Values and Replaced Content
- Text Effects
- 2D Transformations
- 3D Transformations
- Animations
- Multiple Column Layout
- User Interface
