Example

```
<html>
<head>

<style>

    .animated {
        background-image: url(/css/images/logo.png);
        background-repeat: no-repeat;
        background-position: left top;
        padding-top:95px;
        margin-bottom:60px;
        -webkit-animation-duration: 10s;
        animation-duration: 10s;
        -webkit-animation-fill-mode: both;
        animation-fill-mode: both;
    }

    @-webkit-keyframes fadeOutDown {
        0% {
            opacity: 1;
            -webkit-transform: translateY(0);
        }
        100% {
            opacity: 0;
            -webkit-transform: translateY(20px);
        }
    }

    @keyframes fadeOutDown {
        0% {
            opacity: 1;
            transform: translateY(0);
        }
        100% {
            opacity: 0;
            transform: translateY(20px);
        }
    }
}
```

```
    }  
    .fadeOutDown {  
      -webkit-animation-name: fadeOutDown;  
      animation-name: fadeOutDown;  
    }  
  </style>  
</head>  
<body>  
  
  <div ></div>  
  <button onclick="myFunction()">Reload page</button>  
  
  <script>  
    function myFunction() {  
      location.reload();  
    }  
  </script>  
  
</body>  
</html>
```

Output

It will produce the following result –
