Copyright © tutorialspoint.com

Description

Sets an element's bottom border; value is one or more of a color, a value for border-bottom-width, and a value for border-style.

Possible Values

Possible value is one or more of a color, a value for border-width, and a value for border-style.

Applies to

All the HTML elements.

DOM Syntax

```
object.style.borderBottom = "2px solid red";
```

Example

The border-bottom property allows you to specify color, style, and width of bottom lines in one property –

Following is the example to show to use all the three properties into a single property.

```
<html>
<head>
</head>
<body>
  <p style="border-bottom:4px solid red;">
    This example is showing shorthand property for border-bottom.
  </p>
</body>
</html>
```

It will produce the following result –
