CSS - BORDER-TOP

Description

Sets an element's top border; value is one or more of a color, a value for border-top-width, and a value for border-style.

Possible Values

Possible value is one or more of a color, a value for border-width, and a value for border-style.

Applies to

All the HTML elements.

DOM Syntax

```
object.style.borderTop = "2px solid red";
```

Example

The border-top property allows you to specify color, style, and width of top lines in one property −

Following is the example to show to use all the three properties into a single property.

```
<p style="border-top:4px solid red;">
This example is showing shorthand property for border-top.
</p>
```

This will produce following result −
