

CSS - BORDER

Description

border is a shorthand property which sets the style, color, and width of the border around an element.

Possible Values

Possible value is one or more of a color, a value for border-width, and a value for border-style.

Applies to

All the HTML elements.

DOM Syntax

```
object.style.border = "2px solid red";
```

Example

Following is the example to show to use all the three properties into a single property. This is the most frequently used property to set border around any element.

```
<html>
  <head>
  </head>
  <body>
    <p style="border:4px solid red;">
      This example is showing shorthand property for border.
    </p>
  </body>
</html>
```

It will produce the following result –
