

CSS2 - CLASSIFICATION PROPERTIES

http://www.tutorialspoint.com/css/css_classification_references.htm

Copyright © tutorialspoint.com

This is a complete reference guide for web developers where we have listed all the CSS properties related to classification defined in the World Wide Web Consortium's Recommended Specification for Cascading Style Sheets, Level 2.

Click any property to see its description with examples –

Property	Description
clear	Sets which margins of an element must not be adjacent to a floating element; the element is moved down until that margin is clear.
cursor	Defines shap of the cursor.
display	Controls how an element is displayed.
float	Determines if an element floats to the left or right, allowing text to wrap around it or be displayed inline.
position	Sets the positioning model for an element.
visibility	Determines if an element is visible in the document or table.
