Copyright © tutorialspoint.com

Description

The *cue-after* property is used in audio devices to play a sound after an element.

Possible Values

- **none** – No media file.
- **URI** – Location of media file.

Applies to

All the HTML elements.

DOM Syntax

```
object.style.cueAfter = url("music.wav");
```

Example

Here is the example –

```
<style type="text/css">
  <!--
    a {cue-after: url("bell.aiff");}
    h1 {cue-after: url("pop.au"); }
  -->
</style>
```

It will produce the following result –
