

Description

The *list-style* property is a shorthand property used to set the position and type of markers in a list; it can also be used to assign an image as the marker.

Possible Values

- **<list-style-type>** – Any permitted value for the property list-style-type.
- **<list-style-position>** – Any permitted value for the property list-style-position.
- **<list-style-image>** – Any permitted value for the property list-style-image.

Applies to

All the elements with a display of list-item.

DOM Syntax

```
object.style.listStyle = "decimal;"
```

Example

Here is the example –

```
<html>
<head>
</head>

<body>
  <ul style="list-style-type:circle;">
    <li>Maths</li>
    <li>Social Science</li>
    <li>Physics</li>
  </ul>

  <ul style="list-style-type:square;">
    <li>Maths</li>
    <li>Social Science</li>
    <li>Physics</li>
  </ul>

  <ol style="list-style-type:decimal;">
    <li>Maths</li>
    <li>Social Science</li>
    <li>Physics</li>
  </ol>

  <ol style="list-style-type:lower-alpha;">
    <li>Maths</li>
    <li>Social Science</li>
    <li>Physics</li>
  </ol>

  <ol style="list-style-type:lower-roman;">
    <li>Maths</li>
    <li>Social Science</li>
    <li>Physics</li>
  </ol>
</body>
```

```
</html>
```

This will produce following result –
