

Description

The *marker-offset* property defines the distance between the nearest border edges of a marker and its associated principal box.

Unfortunately, however, this property is not supported in IE 6 or Netscape 7.

Possible Values

- **length** – Any length value.
- **auto** – Default, Let the browsers automatically set it.

Applies to

All the elements with a display of marker.

DOM Syntax

```
object.style.markerOffset = "5px"
```

Example

Here is the example –

```
<html>
  <head>
  </head>
  <body>
    <ul style="list-style: inside square; marker-offset:2em;">
      <li>Maths</li>
      <li>Social Science</li>
      <li>Physics</li>
    </ul>

    <ol style="list-style: outside upper-alpha; marker-offset:2cm;">
      <li>Maths</li>
      <li>Social Science</li>
      <li>Physics</li>
    </ol>
  </body>
</html>
```

This will produce following result –

- Maths
- Social Science
- Physics

A. Maths

B. Social Science

C. Physics
