

Description

The *marks* property is used to set crop marks and cross marks on paged media. This is used with the @page rule.

Possible Values

- **crop** – Directs that crop marks be placed on the page.
- **cross** – Causes the user agent to add cross marks to the page.
- **none** – No marks should be placed on the page.

Applies to

Page context

DOM Syntax

```
object.style.marks = "crop"
```

Example

Here is the example –

```
<html>
  <head>
  </head>
  <style>
    mark {
      background-color: yellow;
      color: black;
    }
  </style>
  <body>
    <p>Tutorialspoint.com</p>

    <mark>Tutorialspoint.com</mark>
    <p>Tutorialspoint.com</p>
  </body>
</html>
```
