

CSS - OUTLINE-COLOR-STYLE

Description

The *outline-color* property determines the style of an outline around an element.

Possible Values

- **none** – No outline is drawn.
- **dotted** – The outline is drawn as a series of dots.
- **dashed** – The outline is drawn as a series of short line segments.
- **solid** – The outline is drawn as a single unbroken line.
- **double** – The outline is drawn as a pair of unbroken lines.
- **groove** – The outline is drawn as though it were a furrow carved into the surface of the document.
- **ridge** – The outline is drawn as though it were a ridge pushing up the surface of the document.
- **inset** – The outline is drawn as though the entire element is pushing the surface of the document away from the user.
- **outset** – The outline is drawn as though the entire element is pushing the surface of the document toward the user.

Applies to

All the HTML elements.

DOM Syntax

```
object.style.outlineStyle = "solid";
```

Example

Here is the example –

```
<html>
  <head>
  </head>

  <body>
    <p style="outline-width:thin; outline-style:solid;">
      This text is having thin solid outline.
    </p>
    <br />

    <p style="outline-width:thick; outline-style:dashed;">
      This text is having thick dashed outline.
    </p>
    <br />

    <p style="outline-width:5px;outline-style:dotted;">
      This text is having 5x dotted outline.
    </p>
  </body>

</html>
```

This will produce following result –
