

Description

The *outline* property is a shorthand property which is used to set the width, color, and style of an outline around an element.

Possible Values

- **<outline-color>** – Any permitted value of the property outline-color.
- **<outline-style>** – Any permitted value of the property outline-style.
- **<outline-width>** – Any permitted value of the property outline-width.

Applies to

All the HTML elements.

DOM Syntax

```
object.style.outline = "thin solid red";
```

Example

Here is the example:

```
<html>
  <head>
  </head>

  <body>
    <p style="outline:thin solid red;">
      This text is having thin solid red outline.
    </p>
    <br />

    <p style="outline:thick dashed #009900;">
      This text is having thick dashed green outline.
    </p>
    <br />

    <p style="outline:5px dotted rgb(13,33,232);">
      This text is having 5x dotted blue outline.
    </p>
  </body>
</html>
```

This will produce following result –
