Copyright © tutorialspoint.com

Description

The *padding-left* property sets the width of the padding on the left of an element.

Possible Values

- **length** – Any length value. Negative length values are not permitted for this property.
- **percentage** – The left padding's width is calculated with respect to the width of the element's containing block.

Applies to

All the HTML elements.

DOM Syntax

```
object.style.paddingLeft = "10px";
```

Example

Here is the example –

```
<html>
  <head>
  </head>
  <body>
    <p style="padding-left: 15px; border:1px solid black;">
      This is a paragraph with a specified left padding
    </p>

    <p style="padding-left: 15%; border:1px solid black;">
      This is another paragraph with a specified left padding in percent
    </p>
  </body>
</html>
```

This will produce following result –
