

CSS2 - PRINT PROPERTIES

http://www.tutorialspoint.com/css/css_print_references.htm

Copyright © tutorialspoint.com

This is a complete reference guide for web developers where we have listed all the CSS properties related to print defined in the World Wide Web Consortium's Recommended Specification for Cascading Style Sheets, Level 2.

Click any property to see its description with examples –

Property	Description
marks	The marks property is used to set crop marks and cross marks on paged media. This is used with the @page rule.
orphans	Sets the minimum number of lines allowed in an orphaned paragraph fragment.
page	Associates a named page layout with an element.
page-break-after	Forces or suppresses page breaks after an element.
page-break-before	Forces or suppresses page breaks before an element.
page-break-inside	Suppresses page breaks within an element.
size	The size property is used in paged media to specify the size of the page.
widows	Sets the minimum number of lines allowed in a widowed paragraph fragment.
width	Defines the width of an element.
