

CSS - RICHNESS

http://www.tutorialspoint.com/css/css_richness.htm

Copyright © tutorialspoint.com

Description

The *richness* property defines the degree to which a voice will "carry."

Possible Values

- **number** – The higher the numeric value, the more rich the voice and the further it will carry. A lower value will produce a voice which is soft and mellifluous.

DOM Syntax

```
object.style.richness = "80";
```

Applies to

All the HTML elements

Example

Here is the example –

```
<style tyle="text/css">
  <!--
    *.chairman-kaga {richness: 80;}
    div.aside {richness: 10;}
  -->
</style>
```
