CSS - TEXT-DECORATION

Description

The *text-decoration* property is used to add "decorations" to inline content.

Possible Values

- **none** – No decoration should be added to the inline text.

- **underline** – An underline is drawn beneath the inline text.

- **overline** – An overline is drawn above the inline text.

- **line-through** – A line should be drawn through the middle of the inline text.

- **blink** – The inline text should blink on and off, analogous to the BLINK element introduced by Netscape.

Applies to

All the HTML elements.

DOM Syntax

```
object.style.textDecoration = "underline";
```

Example

Following is the example which demonstrates how to decorate a text.

NOTE – Blink property does not work with all the browsers.

```html
<html>
    <head>
    </head>
    <body>
        <p style="text-decoration:underline;">
        This will be underlined
        </p>

        <p style="text-decoration:line-through;">
        This will be striked through.
        </p>

        <p style="text-decoration:overline;">
        This will have a over line.
        </p>

        <p style="text-decoration:blink;">
        This text will have blinking effect
        </p>
    </body>
</html>
```

This will produce following result –
