HIBERNATE TUTORIAL

Hibernate is a high-performance Object/Relational persistence and query service which is licensed under the open source GNU Lesser General Public License $LGPL$ and is free to download. Hibernate not only takes care of the mapping from Java classes to database tables $and from Java datatypes to SQL datatypes$, but also provides data query and retrieval facilities.

This tutorial will teach you how to use Hibernate to develop your database based web applications in simple and easy steps

AUDIENCE

This tutorial is designed for Java programmers with a need to understand the Hibernate framework and API. After completing this tutorial you will find yourself at a moderate level of expertise in using Hibernate from where you can take yourself to next levels.

PREREQUISITES

We assume you have good understanding of the Java programming language. A basic understanding of relational databases, JDBC and SQL is very helpful.
