

HTML BLINK TAG

http://www.tutorialspoint.com/html/html_blink_tag.htm

Copyright © tutorialspoint.com

Description

The HTML <blink> tag is used to enclose a text to make it blink. *This tag was supported by Netscape and now this is obsolete.*

Example

```
<!DOCTYPE html>
<html>
<head>
<title>HTML blink Tag</title>
</head>
<body>
<blink>This text will blink in Netscape Version 5.0</blink>
</body>
</html>
```

This will produce following result:

This text will blink in Netscape Version 5.0
