HTML <BLOCKQUOTE> TAG

Description

The HTML <blockquote> tag is used for indicating long quotations *i. e. quotationsthatspanmultiplelines*. It should contain only block-level elements within it, and not just plain text.

Example

```
<!DOCTYPE html>
<html>
<head>
<title>HTML blockquote Tag</title>
</head>
<body>
<blockquote>Browsers generally render blockquote text as indented text. If your quoted
text needs to display within a non-quoted paragraph, you should use the HTML q tag. Most
browsers surround q text with quotation marks.</blockquote>
<q>Browsers generally render blockquote text as indented text. If your quoted text needs
to display within a non-quoted paragraph, you should use the HTML q tag. Most browsers
surround q text with quotation marks.</q>
</body>
</html>
```

This will produce following result:

> *Browsers generally render blockquote text as indented text. If your quoted text needs to display within a non-quoted paragraph, you should use the HTML q tag. Most browsers surround q text with quotation marks.*

"Browsers generally render blockquote text as indented text. If your quoted text needs to display within a non-quoted paragraph, you should use the HTML q tag. Most browsers surround q text with quotation marks."

Global Attributes

This tag supports all the global attributes described in - **HTML Attribute Reference**
