Copyright © tutorialspoint.com

Description

The HTML tag is used to specify the font of the text. It is deprecated in HTML as well as in XHTML.

Example

```
<!DOCTYPE html>
<html>
<head>
<title>HTML font Tag</title>
</head>
<body>
<font face="cursive, serif" color="#ff9900" size="4">
The HTML font tag is now deprecated. You should use start using CSS to set font size and family.
</font>
</body>
</html>
```

This will produce following result:

The HTML font tag is now deprecated. You should use start using CSS to set font size and family.
