

HTML <NOEMBED> TAG

http://www.tutorialspoint.com/html/html_noembed_tag.htm

Copyright © tutorialspoint.com

Description

The HTML <noembed> tag is used to handle browsers which do not support the <embed> tag. The <noembed> tag makes it easy to supply alternative content that tells users what they are missing.

Example

```
<!DOCTYPE html>
<html>
<head>
<title>HTML noembed Tag</title>
</head>
<body>
<embed src="/html/yourfile.swf" width="200" height="200" >
  <noembed></noembed>
</embed>
</body>
</html>
```

The message inside <noembed> tag will appear only when your browser does not support <embed> tag. So based on your browser it will display following result:

Browser Support

Chrome	Firefox	IE	Opera	Safari	Android
Yes	Yes	Yes	Yes	Yes	Yes
