Description

The HTML <object> tag is used to embed multimedia in an HTML document. The <param> tag is also used along with this tag to define various parameters.

Example:

```
<!DOCTYPE html>
<html>
<head>
<title>HTML object Tag</title>
</head>
<body>
<object data="/html/test.jpg" type="text/html" width="300" height="200">
  alt : <a href="/html/test.htm">test.jpg</a>
</object>
</body>
</html>
```

This will produce following result:

alt : [test.htm](/html/test.htm)
