Instagram is one of the fastest growing social platforms and it has gained immense popularity over the years. It has become one of the most essential social networks amongst people, and continues to develop in popularity with over 400+ million dynamic users a month. It’s no wonder then that businesses of all shapes and sizes are seizing the opportunity to use Instagram as one of their main marketing channels for brand awareness. If used properly, Instagram can be a great marketing tool for all sorts of businesses, whether you are selling a product or a service.

What is Instagram?

Instagram is an online photo sharing social Web service that lets you share your life and experiences with friends and others through a series of pictures captured with a mobile device or any other camera. Instagram also supports video uploads and lets the users instantly share photos on several social sites.

Instagram was founded by Kevin Systrom and Mike Krieger in October, 2010. Its success caught the eye of the most valuable social network in the world. In April, 2012, Facebook acquired Instagram for $300 million in cash and 23 million shares of stock, a total purchase value of nearly $1 billion.

Instagram’s social intrigue was not simply to influence the existing social networks for sharing, but to build its own, supplemental network. This was a vital choice. The value of a network is fundamentally in its connections. Through Instagram you can not only connect and share with your friends, but you can also increase your professional network.

Instagram can be used as a marketing strategy to market your brand.
 BASICS OF INSTAGRAM

Instagram is available for free on iOS, Android and Windows Phone devices. Instagram can also be accessed on the web from a computer, but the users can only upload and share photos or videos from their devices. Users can post pictures and videos using their smartphones, apply diverse manipulation tools, 16 filters, in order to change the appearance of an image, and share them directly on various platforms in addition to the user’s Instagram page.

Instagram also permits the users to add some captions, hashtags using the # symbol to describe the pictures and videos, and tag or mention other users by using the @ symbol before posting them.

In addition to photograph capturing and other functions, Instagram also provides a similar platform for social connectivity as other social networking sites. Users of Instagram can follow any number of other users. However in Instagram, the users following another Instagram user are called as followers.

Instagram’s social network is asymmetric, implying that if a user X follows Y, then Y need not follow X. Also, users can choose their privacy settings according to their own preferences such that their posted photos and videos are available only to the user’s followers that need approval from the user to be his/her follower. By default, their images and videos are public which implies that they are visible to anyone using Instagram app or Instagram website.

The users can consume photos and videos, mostly by viewing a core page showing a stream of the latest photos and videos from all their friends, listed in a reverse chronological order. They can also like or comment on these posts. Such actions will appear in referenced user’s Updates page so that the user can keep track of likes and comments about their posts. Therefore, Instagram can likewise be regarded as a social awareness tool similar to other social media platforms such as Facebook and Twitter.

ADVANTAGES OF USING INSTAGRAM

Some of the advantages of using Instagram that adds to business opportunities are discussed below.

YOU CAN INVITE MORE USERS TO WINDOW SHOP

With this social media app, you can provide window-shopping experience for your followers, giving them an essence of your products and services. Share relevant and valuable information in the caption, like location details, sales, and something else to get the interest of your followers. Ensure you explain all relevant product information, in case your followers wish to purchase the product you feature in the photo.
You can promote your brand

One can use Instagram to post marvelous photographs about your firm's services and products. On the other hand, maintain a strategic distance from any sort of exhausting, content heavy images, or any other infographics. Take and post pictures of you and your workers at work or at any company event. Utilize the captions to share correlated and interesting information about the workers and what's happening in the picture.

When you attend a special event, begin work on a new project, or do anything energizing and photo-worthy, ensure you capture the event. Knowing what is going on in your world keeps your organization on the mind of your customers. Integrating Instagram into your social media marketing campaign can be a great tool to promote your business while being imaginative at the same time.

You can attract fans and boost sales

Instagram can be a staggering way to draw in more followers to your organization by promoting coupon codes and selective discounts. You can do this with any of your services and items. Creating exclusivity and favored status for particular audiences is a proven technique for driving engagement.
2. Instagram – Business Strategy

Instagram being a part of your business strategy can go a long way for successful business outcomes. Following are some of the points to remember:

**Engage your customers**

Utilize the @mention to promote the "follower of the day" on Instagram, and you will connect with a considerable measure of potential clients immediately. This will advance your customers, which will urge them to work with you significantly further.

The @mention is used to tag any client in comments inside Instagram, and you can employ it to generate the growth of your audience over time. This method can develop a relevant and engaged audience of high value to your brand or business. You can also use hashtags (#) as a method of growing your audience.

**Build content**

Instagram is a predominantly visual type of online networking, and a perfect stage for flaunting items through video or pictures. While building a strategy, you will have to figure out which strategy will work best for the service or products that you are promoting. Video is frequently the most ideal approach to publicize viable products. For example, tools, as you can exhibit the utilization of the item. For products such as garments, pictures are more appropriate.

**Always hashtag**

Using hashtags on Instagram is basic for your business. Hashtags enable users to discover content or brands which they would like to follow. Once a user has been directed to your profile by means of their search, you can then lead them to your website. Instagram allows a maximum of thirty hashtags to be included in a post or comment. However, ensure that you do not overuse them.

**Connect to other forms of social media**

Sharing your Instagram content with your other social media accounts will surely save your time and will help to increase your leads. Connect your Instagram profile to a variety of other social media platforms such as Twitter, Tumblr, Facebook, Flickr, and Foursquare. For example, if you have a Facebook business page you can arrange it so that all your Instagram posts and photos appear on your Facebook business page as well.
Use sponsored ads and posts

The use of Instagram's sponsored posts and advertisements have finally spread worldwide and are proving very popular. Instagram advertising is still in the early stages of availability. Ads are available in 30 second video format, as images, and in carousel format too. These adverts are an ideal way to direct consumers to your website or to tell the story of your brand in a better way.

Post according to an editorial calendar

Instagram was designed as an app to create content via a mobile device. As a result, it is only practical to use one of the various scheduling tools available, so that you can post systematically. By the help of using an editorial calendar, you are able to schedule regular posts in advance, to keep your followers engaged. It is also a useful method to use when you are promoting something, or attending an event. By doing so, you will never forget to send out content, and that content can be scheduled to be released when you are because of some reasons not available to do it manually.

Partner with Instagram influencers

Presently, Instagram has over 40,000 influencers using their platform, and they cover a variety of topics and businesses. They are viewed as the big names of Instagram, and by adjusting your image to the right influencers, you can extend your image awareness and number of followers. Your influencer simply needs to incorporate the handle of your brand in one of their Instagram posts.

Ideas to Flip-up Instagram

The best way to make your post viral is to make it worthy. Following are a few pointers:

- Mine positive things about your products and services. Highlight them in your posts.
- Add inspirational quotes to compel people to read your post.
- Add appealing images or videos. Visuals speak more than thousand words.
- Lay a call-to-action for a definite purpose.
- Compel users to generate content for you by engaging them in your post. Repost fan created content on your Instagram account.

Eyeing Your Competitors

A standout amongst the most essential perspectives to maintaining a fruitful business is looking at your opposition and staying up with the latest developments. The same goes for Instagram. It's critical to investigate your competitor's Instagram profiles. This will give you a few ideas for substance that you can post to Instagram also. Some of the aspects which one should consider are:
How do competitors position themselves?
Discover how your rivals position themselves on online networking. You can simply visit each of your competitor’s profiles for inspiration. These bios give you an idea of how you can position yourself on Instagram in order to be attractive to your target audience.

How often do competitors post?
In case you’re thinking about how active you ought to be on Instagram, consult competitive research. Obviously, this isn't all you have to know with regards to social activity. You ought to likewise take a look at the engagement your competitor gets on Instagram. Analyze the number of posts and engagement to see where competitors post and receive the most (or least) audience response.

What do competitors post?
Get inspiration for the type of posts you ought to publish on Instagram by analyzing the competitors’ top content specific to that platform. This analysis can help you figure out whether you should post photos or videos, when you should post them, and the type of captions you should include with the posts for best engagement opportunities. Using these posts as inspiration, you can come up with interesting ideas for your business that will fit well on Instagram.

What do people say about competitors?
Comprehending what individuals say about your competitors can give you a vibe for the kind of engagement you will get through Instagram. For instance, do individuals ask sales questions and support questions to your competitors? Do people talk positively or negatively about the industry?

You may even have to recognize some ways you can tailor your products and services to fill in the ranges your rivals’ products and services miss. Generally speaking, it ought to set you up for the kind of discussions you may keep running into for your business on social media and give ideas on how to handle them.

Schedule Instagram Posts
It is very important to schedule Instagram posts. One can do this with the help of the following tools:

ScheduGram
- Post now or schedule for some other time.
- You can deal with multiple Instagram accounts through one easy web-based interface.
• Multiple users: Let multiple users sign into your ScheduGram account, schedule posts for your accounts, and see who has scheduled what.

Latergramme
• Collaborate with your group.
• Manage various Instagram accounts.
• Search, explore, and discover user-generated content to repost from the web.

Hootsuite
• Schedule and publish Instagram content.
• Monitor and engage with Instagram audiences.
• Securely share access to Instagram accounts across groups.
• Create group workflows, including assignments and endorsement for Instagram.

Paid Instagram Campaigns
It's vital to note that Instagram is trying different things with paid advertising opportunities. The program is generally new, and at this moment it's held for huge brands that as of now have a presence on Instagram. It is unquestionably something to watch out for, on the grounds that they have more than 300 million users. Advertising on Instagram permits you to get your photographs, your captions, and your messages out to the users that follow you, as well as to the whole community of Instagram users.
If we scroll down the Instagram website at business.instagram.com/advertising, on the page there are some resources that you can consider. You can take a look at an inspiring gallery that shows you how organizations are truly making use and being imaginative on Instagram. You can also take a look at some of the statistics and results for those organizations that have been able to advertise on Instagram. And those results show an expanded awareness and a high rate of advertisement review. There are also some case studies available on the website that demonstrate how brand recognition has expanded for those organizations using paid advertisements on Instagram.

Again, this open door isn't accessible for everyone at this moment, yet it's unquestionably something to watch out for. If you advertise on Facebook, once this opens up for everyone, you're likely going to want to advertise on Instagram too.
Instagram is one of the best platforms of social benefits. From creating brand awareness to hosting contests, etc.

**Navigating through Instagram**

**Method 1**
To give a fresh start download Instagram App on iOS/android phones/tablets. Once Installed, open the app.

Sign-up for a new account either using your email address or login with Facebook. If proceeding with email, create username and password. Fill your profile details and you are done signing up. If you register with Facebook, you are required to login to your Facebook account.

**Method 2**
Another way to install app is using your PC. Go to instagram.com and repeat the same process.

You’ll come across the Log In Screen. It allows new users to register for a new account as said described above and returning users can login to their account. They can also recover their password in case they forget one.
Next, you encounter is the Profile Screen that shows your bio and posts. You can edit it. How? We’ll learn more in subsequent sections.

Web Profiles let you access your account on the web by following instagram.com domain.

Camera is Instagram camera that allows you to click pictures and upload it directly or from the phone gallery.

Search and explore lets you find photos and videos from others account.

Home shows your friends’ feed. You can like or comment on them.

Activity shows likes and comments on your posts.

**Instagram Terms**

Before we move ahead, it is important to know some important terms related to Instagram.

- **Post** - A post refers to an image which is uploaded to Instagram by someone. A post may comprise of a caption, a geo tag, and also tags of other users.
• **Like** - Instagram like many other social networking websites is also based on receiving likes, and liking other users’ photos. You can like an image simply by double tapping the image itself, or just by clicking the ‘like’ button to the bottom left of the image.

• **Your Username** - It is the name of your account, which people will type to find you, and which is also the address to view your profile online on Instagram.

• **Follower** - A follower is a user who follows your account, and views every photo which you publish on their feed on Instagram.

• **Caption** - The caption is generally the breeding ground for the hashtag, and provides an opportunity to link photos to their suitable subject matters.

• **Comments** – The reaction of a user to another user's photo on Instagram.

• **Explore Tab** - This tab enables two important features - searching and discovering.

---

**Optimizing Instagram Profile**

Before you begin uploading photos and videos to Instagram, it's vital to optimize your Instagram profiles with the goal that individuals know who we are and where they can discover more about us.

To do this, from the Instagram home page, first tap on the Profile link at the bottom right corner of the screen. From here you can see your Instagram profile. You will notice that there is no information in here yet. To fill this, tap on the Edit Your Profile link. On this screen, there are various distinctive fields that you can fill to give people more information about who you are.
While filling the details you should keep the following things in mind:

- **Make sure your bio accurately represents your brand** — Your bio is your presentation. When somebody is finding your image, then you should ensure that you put your best (and genuine) foot forward. You should ensure that your bio is predictable with your image. Adhere to your brand voice and address your intended interest group.

- **Carefully pick your profile image** — Despite in the event that you utilize your logo or something else, ensure your profile picture is measured appropriately for Instagram. Poorly sized profile photographs look messy and detract from the credibility of your brand. It is seen that the best Instagram brands use their organization logo as their profile picture. This is highly recommended as it helps in keeping the branding consistent.

After you have added some information to our Instagram profile. You can likewise update your private information if you like, however, it's really not that important because people are not going to be seeing that information. Whenever you're ready, tap Done in the top right corner of the screen.
This chapter will deal with posting photos and videos on Instagram. It will also cover how to foster engagement with other users and followers.

**Post Photos and Videos**

The cream of Instagram is, patently, sharing photos. So in order to upload a photo, first, click the blue camera button in the center of your Instagram navigation panel. Automatically, Instagram activates your device’s camera, so that you may either choose to click a picture at that time, or choose a picture which is already saved in your device. If you choose the latter, click the double-square button on the lower-left corner of the screen.
One thing you must keep in mind is that if you select a photo from your camera roll, then Instagram sizes the photos to perfect squares. So, if you select a photo that was originally taken horizontally, you will have to crop some portions of the image, or live with the default black border.

With Instagram video, you can record short video clips ranging anywhere from three to fifteen seconds in length. In order to record a video, press the camera button and select the video recorder option on the right. If you are not satisfied with the video, you may also delete it.

Once you begin uploading photos and videos to Instagram, your followers are going to start interacting with those photos and videos. They are going to start liking and commenting on them. Hence, it is important to review your activity for a couple of diverse reasons. Mainly, it's important to listen to the feedback of your followers. Possibly, you just posted a photo of a brand new product and followers are commenting about what they like and what they don't like about it. This is an important information that you can assemble right here on Instagram. Moreover, it's also a great way to measure your prosperity on Instagram.

**Foster Engagement**

When we talk about boosting business via Instagram, the main game is engaging people. Social media is not about followers and likes rather it is about your followers take on your posts. How is it benefitting them? How will you know people are engaging with your content? The answer to this is simple. The more the comments the more the engagement. When we talk about fostering engagement on social media, Instagram people seem to be most enthusiastic.

As per a study conducted by Forrester, Instagram per follower engagement rate for top brands is higher by 58 times than on Facebook and 120 times that on Twitter.
To achieve more engagement:

- **Use HASHTAGS.** Hashtags make posts visible on the corresponding hashtag page. When your text is followed by hashtag, your page is more discoverable by people searching your query.

- **Build a COMMUNITY.** Try to build the largest possible community. When you comment on someone’s post, you tend to follow them. This engagement lets your name appear in their feed repeatedly. This builds engagement.

- **Use an attractive THEME.** If your article is in a particular theme, it looks more appealing and niche.

- **Use beautiful COLORS to give a pleasant look to your account.** This makes your feed look beautiful and binds the readers.

- **Tell a TALE to earn followers.** Your post should not be just an image, it should have an impressive story to tell.

- **MONITOR your account continuously.** You can measure the growth of your account using Iconosquare. It now has a PRO version too.

## Interact with the Community

Social Media is not just about advertising. It is about interacting with people, groups, and communities. To interact with Instagram community, search for magnifying glass search icon at the bottom of page. You can search people of desired interest here. You can look for friends, mentors, competitors, people of any benefit to you.

To start interacting, like the post either by a double-click on the post or by clicking the heart button. To take this interaction to further level, leave a comment by clicking the Chat bubble icon. Mention specific people using a prefix @ before their name.

Instagram community is definitely a new way of interacting with people. Over 150 million people interact with each other every month on this platform.
In the event that you post five photographs on Instagram, and one of those photographs is getting significantly more likes and comments than the other four, it’s vital to investigate that photograph to discover why it has been so effective. You can attempt to reproduce that accomplishment with future photographs and recordings that you upload to Instagram. Thankfully, Instagram has an in-built feature for this. From our Home screen, if we tap on the fourth link on the bottom of our screen, which is the chat bubble with the heart in it, it will take us to our Activity screen.

If you have any unread activity, or if people have interacted with your comment and you have not reviewed it yet, there will be a little orange dot just below that chat bubble. Go ahead and tap on that link. After tapping on the Activity link, you can see all of the activity that people are having with your Instagram account. You will also see when people like or comment on your photos.
There are two tabs at the top of this screen. One is You tab in which you review all the activity that has to do with you, that is all of the Likes, Comments, and Follows that you receive on Instagram. Alternatively, if you tap on the Following tab, it will show you all of the activity of whom you follow on Instagram. But from business point of view, the most vital aspect of this feature is generally the You tab, where you can see what people think of your content.
On the grounds that Instagram is a moderately segregated social application that lives inherently on mobile, it’s essential to connect social accounts to get the most out of the experience. You may choose to link Instagram to your Facebook, Twitter, Foursquare, Tumblr, Flickr, VK, Mixi and Weibo accounts.

**Linking Social Platforms**

To connect social accounts, head to the Profile Tab -&gt; Edit Sharing Settings -&gt; Linked accounts, then choose the network which you wish to connect.

Each time you upload a photo to Instagram, you will have the option to share to each of the social networks you have enabled, or to none of them. If you choose to share to no social networks, the photo will post only to Instagram, and will be viewed only by those users who follow you on the application.
Adding Filters

After taking or selecting a photo, when you tap next, a set of three icons appears below the image. With the swipe of your finger, you can boost contrast, inject vintage flavor, or just enhance the overall effect of the picture. This not only transforms an ordinary snapshot into a photographic work of art, but it also increases the number of views and comments your post receives.

There are 17 famous Instagram filters which add different predetermined layers to your photos, and give them the desired effect. Scroll through the filters and select the best one for that particular image. Each filter has its own associated border.

Some of the filters are:

- **Clarendon** — Initially released as a video-only filter, Clarendon was later made accessible for photographs too. It escalates shadows and brightens highlights in your photographs.
• **Gingham** — Gingham is another previously video-only filter. When you use it for your photographs, it washes them out. If it is used with a darker photo, it gives a yellowish tone. If using it with a photo loaded with light, it gives a brighter, fantastic look.

• **Moon** — This filter was likewise actually meant just for video, and was named after an Instagram team member’s dog. Consider it as the black and white version of Gingham, with marginally more intense shadows.

• **Lark** — Lark enhances your images and intensifies all your colors, except red color.

• **Ludwig** — Ludwig is an intense filter. Warm colors are warmer, cool colors are darker, and shadows and highlights are comparatively more affirmed.

You should do test a few other options before you save your photo and choose amongst the best.

**Utilizing Hashtags**

Hashtag is a tag, label or metadata used on social media platforms to find a specific content. Hashtags are a path for individuals to look for media on social networks that have a common theme. It permits us to interface our posts on an all-around searchable subject. The purpose of utilizing hashtags is to make a more extensive span than you previously would have on your own.

To create them you need to place # character before a keyword, or a phrase that you want to trigger when someone looks for something similar on the result pages. For example, you want people to see your images of green grass, you can utilize hashtag as #greengrass.

Some more intricate details on utilizing hashtags on Instagram are discussed below.

**Use brand specific hashtags**

Make one-of-a-kind hashtags for your brand or business. These ought to be something that represents what you do or characterizes you particularly.

Your hashtags ought to be unique and easy to remember. Incorporate them in most of your Instagram posts related to your business. When you post content that is not related to business, then you do not need to use your business hashtags.

**Combine popular and less common hashtags**

While you may believe it's best to just use popular hashtags, this is a mistake. Yes, you need to utilize well-known hashtags to build your chances of appearing in popular searches. However, if it is a popular category and everyone else is doing the same thing then surely your post will vanish quickly into the depths of the search results.
Rather, fusing less common hashtags will guarantee that your posts live more in the search items. Blending in a variety of less popular hashtags guarantees you the best of all.

**Create lists of hashtags**

On your device, you can also make a note with your top choice/favored hashtags. You can even make numerous lists if you have different sorts of content which you share on Instagram.

Set the list with your center hashtags and basically copy and paste it into your Instagram post caption to save your typing time.

**Monitoring Location Tags**

If your organization has a brick and mortar location, it is an awesome thought to make use of Instagram's feature that permits you to tag a location for the photographs that you upload. When you tag a location on Instagram, individuals can search for all of the photos that have been tagged in that particular location, so it builds the visibility of your uploads because some person might just be browsing all of the photos in a particular location, discover your photo, and start following you on Instagram.

To add a location on Instagram, there is an option ‘add a location’ when you are uploading a new photograph. However, you can likewise add a location to a photo that you've already uploaded.

To edit a photo that you have already uploaded, just tap on the three dots below the photo and to the right. When you tap on the three dots, you will have an option to edit this photo. Then tap on Edit.

You will notice that at the top of the screen, there is a link that says ‘Add Location’. Tap on that link. Automatically, Instagram's going to try and search to find out what location you are currently at. But in case you are not at the location where the photograph was taken, you can search yourself in the search box at the top of the screen. After the search, tap on the search box and search for that location. Once the location appears, tap on it. Click Done to save the edit.

**Reposting**

You can use others content on your account. Instagram does not offer an inbuilt feature to do the same. Yet, there are many other ways to it. Following are the three possible ways:

**Doing it manually**

You can capture other’s photo and edit it by cropping to the desired level and upload it on your account in same way as you post your pictures. Do not forget to give credit to the original photographer.
Using third party apps
Too simple interface of Instagram hinders us to be creative. You can consider taking help from other options, such as Apps like Repost for Instagram, Regram, Repost, R&R, etc. These Apps are available for IOS and Android. You need to download the App, check for the desired pictures in the App itself and repost the picture. This will directly let you post the image on your Instagram.

Embedding the code
Open the photo you want to repost on your computer. Use Web embed to post the content on your page. Open the photo loaded in a frame on the web browser. Click the share button (located below the comment frame). On clicking, a new frame will open with code. Copy the code to embed the photo on your webpage. The best feature of this method is, the photo is displayed with the photographer’s name which helps in maintaining the authenticity of it. Insert the code in your post and republish it.
While using Instagram to promote your business, it is vital that you monitor your Instagram statistics regularly, with the goal to analyze what's been fruitful on Instagram, and what hasn't been so effective.

We will discuss here some of the tools that you can use to monitor Instagram statistics.

**Tagboard**

Tagboard is a tool to experience content from social networks. Each tagboard is a collection of social media posts that share a typical hashtag. Tagboards can be inserted on websites, coordinated into mobile apps, and shown on displays. Viewers can choose favorites, retweet, reply, comment, and like right from the tagboard.

**Iconosquare**

Iconosquare is a tool to oversee and promote your Instagram account. Deal with your group, study activity, and follower development. Promote your account over other social networks with feed tabs or photo widgets. Draw in your community with photograph contests. Set up, promote, moderate, monitor, and publish results of an Instagram contest all within Iconosquare.

**Crowdfire**

Crowdfire is a tool to manage your relationships on Instagram and Twitter. It is used to find inactive users and unfollowers, and find significant users to follow. Monitor your social Twitter/Instagram accounts.
Collecto

Collecto permits you to connect to your Instagram account, and after that it will run some statistical investigation on your Instagram account. It will provide you with information. For example, it will show how many followers you have, how many likes you have received, and how many comments you have received. It will show which filters you have used that have been the best so that you know, later on, it is most likely a good idea to use the same filter that has been so successful.

Apps to Assist Instagram Posts

Following are a few Apps that help in making your Instagram experience better.

- **Layout**: Layout is Instagram’s collage app, and it is a very easy-to-use app. It permits you to combine 2-9 of your photos into one image. There are three options from which you can pick your photographs - camera roll, recent photos, and an interesting faces option where Layout accumulates the photos you have of various individuals. Additionally, there is a great deal of creative features included such as mirroring, flipping, resizing, and rearranging with only a couple of taps.

- **TakeOff**: TakeOff is an application from Crowdfire to schedule Instagram posts. It serves to consequently schedule posts for times when they will be seen by majority of your followers. TakeOff studies your captions to propose relevant, high discovery hashtags. You can likewise add clients or group members who help you review or create content for Instagram.

- **INK361**: INK361 is a web application, which helps to manage your Instagram account. By using it, you can make albums, discover new contacts, sort who you follow into Circles, and set up alerts for new posts. You can likewise get an unmistakable overview of your Instagram stats to keep track of your social effect after some time.

- **Tapshop**: Tapshop from Piqora helps to get your Instagram fans shopping. With this your clients will get a custom page of products which they have liked and receive an e-mail with links directly to your product pages, as you gather e-mail addresses. It additionally measures the likes, clicks, orders, and revenue generated by your Tapshop page from within your Piqora Publishing Dashboard.

- **Snapseed**: Snapseed is an application used for photograph editing and is prominent with bloggers and creative types. It gives the user control over almost every aspect of their photographs, from full auto correct features to small adjustments.

- **Timer Cam**: In the event that you wish to take a photograph that incorporates yourself or requires you to set your phone down on a tripod or other surface, this
application can take photographs on a timer of up to 30 seconds and then export the photographs. This application is accessible for both Android and iPhone.

- **Everlapse**: Everlapse is an application that makes flipbook style recordings utilizing a series of photographs. So brands and other users can flaunt more than one photograph inside a post and even include others to team up for a photograph album. It is at present accessible only on iPhone devices.
If your organization has a site or blog, you can install your Instagram uploads directly into your site. There are two or three distinctive approaches to do this, contingent upon which stage you’re utilizing to have your site.

**Embedding Pictures on Website**

Visit Instagram.com/engineer/implanting, there are some guidelines on how you can install your Instagram photographs. So, when you can look down this page you will discover which situation is best for you.

You can log into your Instagram account and view your Instagram photos on a computer instead of in the mobile app. To embed one of these photographs, all you have to do is click on the photo and then towards the bottom right of our screen, click on the three dots (circled in red color in the following image).

You will notice that an option to Embed appears. When you tap on that option, you can then tap on the green button that says Copy Embed Code. Now that you have copied this embed code to your clipboard, you can access our web server and paste this code into your website’s code wherever you want the photo to show up.
This is an incredible approach to get users that are going by your organization's site to now follow you on Instagram in light of the fact that if they are on your site and they see that you are uploading photographs to Instagram, they might like it.

Create and Embed Badges

Instagram has launched badges to help you link to and promote your Instagram web profile. Its badges are available in a range of sizes and can be added to your website, blog, or anywhere that you want to link to your Instagram web profile.

You can add a basic Instagram badge to your site that generally tells the users, hey, we are also on Instagram. Come look at us.

To do this, you visit instagram.com/accounts/badges and log in with your Instagram account. You will have a choice to modify an Instagram badge for your site. Thus, on the screen that you are looking at, you can first select the kind of badge that you would like to create.

You can either make only an icon badge and can pick the size, or pick any View on Instagram badge. You have to simply copy the code in the box, and afterward paste that code into your site where you would like the Instagram badge to show up. Quite the same
as embedding Instagram photographs into your site; you may need to get your web developer required for this step.

![Instagram Feed Embed](https://www.instagram.com/account/badge/)

**Learning Widgets**

You can embed your entire Instagram feed directly into your site. However, Instagram doesn't have an implicit approach to do this. There is a third party site called Instansive that permits you to create this widget. You can visit instansive.com, and later make changes to this widget according to your choice.

On the site, the primary thing that you have to do is to add our Instagram username. You could likewise enter a hashtag in the event that you needed to, and that way, you would not embed your own Instagram feed into our site.

As you look down the page, you can determine some distinctive settings for this feed. You can choose regardless of whether it's a grid. You can choose a slideshow, or you could utilize a Pinterest style column. Suppose, you stay with Grid only. After that you can choose what number of columns and rows you have in your grid. You can change all the settings to your liking.

When you're prepared, you can tap on the Preview button at the bottom of the page. On top of the screen, you can now see a preview of your Instagram feed. You can scroll to the bottom and tap on the Get Code button to get the embed code for this Instagram feed. You can see that the code is presently listed down at the bottom, and you can copy this code. Later move over to your site and paste this code where you would like it to show up on your site.

Likewise, with embedding individual photographs and badges on your site, you may need to get your web developer required to get this code in the right place on your site. This is
certainly an incredible approach to expand the visibility of your Instagram account as it will be featuring all your Instagram photographs right on your site.

**Instagram with Facebook**

Instagram allows to advertise within Instagram app, but you are required to be invited to that program which is a difficult task. So to boost your post, you again need an intervention of another party. Take the help of Facebook to promote your post. Link your Instagram account with Facebook account. When sharing a picture, share it on Facebook too. For this, you need to change some setting on your app.

- To share photos on Facebook via Instagram on Windows or IOS phone.
  - Tap this ☊ symbol on your profile.
  - Click Linked Accounts.
  - Click Facebook and link by logging in.

- On Android device
  - Tap this ⌘ symbol on your profile.
  - Repeat the same process as for the Windows phone.

You can also add Instagram account to Facebook page. This lets you create ad in Ads Manager.

- Go to the Facebook page you are admin of.
- Click Settings on the top right of the screen.
- Tap on Instagram Ads.
- Click Add an account.
- Login by Instagram login details.

This will help you reach a large part of your audience.
Statistics on social media is to be followed thoroughly, especially if you are a business person. Many businessmen ignore Instagram because it lacks in providing statistical data. You need to keep track to be successful and lure traffic, and see what is working for you and what is not.

**Tracking and Analysis Tools**

There are numerous tools to measure statistics on Instagram. Following are a few preferred analytics tools:

- **Collecto** can be downloaded from [http://collec.to/](http://collec.to/) Sign up and connect ‘Collecto’ to your Instagram. This lets you see how many people like your post, the number of comments on it, the number of followers you have and most of all shows which applied filters work best for you.

- **Iconosquare** is another way to collect statistics of Instagram accounts. It also lets you see the number of followers, who we follow, number of likes, comments, and the number of uploaded photos.

- **Statigr.am** is another web-based management tool for Instagram. In addition to providing data it lets you take snapshots, manage your recent comments and promote your photos on other platforms like Facebook, etc. It even allows you to run contests.

- **Postso** is a posting and scheduling tool. It lets you post your pictures later on a particular schedule. However, it is a paid tool with 14-days trial.

- **Twtrland** which was earlier a Twitter analytics tool, is now open to Facebook and Instagram. It lets you perform competitor analysis. Beyond that it lets you see statistics, photos posted, and your competitor’s network.

You can set custom dates to run statistics for a particular period. You can see your followers’ growth and track them as well. You can check your Love Rate which is your user engagement. These statistics educate us for the use of more hashtags and location tags. It is important to see every activity to grow. These third party analytical tools help you increase your followers, grow your interaction and engagement.

**Calculating Success**

If people are liking your photos, then you are clearly accomplishing something right. If you notice that couple of photographs are significantly getting more likes than the other photographs, then perhaps you ought to recreate whatever it is you are doing with those couple of photos. In the meantime, if you observe some of your photos are really not receiving the likes that most of your other photos are receiving, then maybe there is
something about those photographs, that followers are not liking. It may be a smart idea to refrain from posting such photos in future.

Similarly, comments should also be analyzed on Instagram. If followers are commenting on your photos, then it clearly moved them enough to actually write a response. And this might even be more essential than likes, because now that they are reacting, they are most likely going to be probably recalling that particular Instagram post because they actually had an innovative interaction with it.

It’s also essential to look at your followers on Instagram. If you make a post on Wednesday, and then all of a sudden Wednesday afternoon you have 30 new followers. This means perhaps there was something about that post that pulled in new users to your Instagram page. Maybe you used a new hashtag or you tagged your location. So, it is vital to take a look at these factors when measuring your success on Instagram.

It is also vital to listen to the feedback of your followers. If people are posting comments on your photos, do not simply look to see which photos have the most comments and which do not have, but first look at what is the actual content of the comment. Analyze that, do they like the photograph? Do they dislike the photograph? Do they have suggestions for something else in the future? If they do, perhaps listen to them and give them what they ask for. This gives them a feeling of being valued, and they see your organization as being user-friendly.

Check which individuals are discussing about you or your organizations on Instagram. Search and discover various Instagram hashtags. Both industry related and exact match hashtags can uncover a great deal about what individuals are saying in regards to you online.

You should also observe if people are clicking through the link on your Instagram page, once they find you or not. For this, you can also track clicks in Google Analytics. You can simply create a landing page for your Instagram clicks and track the conversions there.

You can measure your own Instagram success just by breaking down the interaction that your photos are getting, and trying to pinpoint why certain photos are receiving certain types of engagement and others may not be receiving that specific type of engagement.
