

JAVA.LANG.CLASS.GETSIGNERS METHOD

http://www.tutorialspoint.com/java/lang/class_getsigners.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Class.getSigners** gets the signers of this class.

Declaration

Following is the declaration for **java.lang.Class.getSigners** method

```
public Object[] getSigners()
```

Parameters

- NA

Return Value

This method returns the signers of this class, or null if there are no signers and returns null if this object represents a primitive type or void.

Exception

- NA

Example

The following example shows the usage of java.lang.Class.getSigners method.

```
package com.tutorialspoint;

import java.lang.*;

public class ClassDemo {

    public static void main(String[] args) {

        try {
            Class cls = Class.forName("ClassDemo");

            // returns the name of the class
            System.out.println("Class = " + cls.getName());

            Object[] obj = cls.getSigners();
            System.out.println("Value = " + obj);
        } catch (ClassNotFoundException ex) {
            System.out.println(ex.toString());
        }
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Class = ClassDemo
Value = null
```
