

JAVA.LANG.DOUBLE.DOUBLEVALUE METHOD

http://www.tutorialspoint.com/java/lang/double_doublevalue.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Double.doubleValue** method returns the double value of this Double object.

Declaration

Following is the declaration for **java.lang.Double.doubleValue** method

```
public double doubleValue()
```

Parameters

- NA

Return Value

This method returns the double value represented by this object.

Exception

- NA

Example

The following example shows the usage of java.lang.Double.doubleValue method.

```
package com.tutorialspoint;

import java.lang.*;

public class DoubleDemo {

    public static void main(String[] args) {

        // returns the double value of this Double object
        Double obj = new Double("10.35");
        double d = obj.doubleValue();
        System.out.println("Value = " + d);

        obj = new Double("90");
        d = obj.doubleValue();
        System.out.println("Value = " + d);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Value = 10.35
Value = 90.0
```
