

JAVA.LANG.DOUBLE.TOSTRING METHOD EXAMPLE

http://www.tutorialspoint.com/java/lang/double_tostring.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Double.toString** method returns a string representation of this Double object.

Declaration

Following is the declaration for **java.lang.Double.toString** method

```
public String toString()
```

Parameters

- NA

Return Value

This method returns a String representation of this object.

Exception

- NA

Example

The following example shows the usage of java.lang.Double.toString method.

```
package com.tutorialspoint;

import java.lang.*;

public class DoubleDemo {

    public static void main(String[] args) {

        Double d = new Double("5.3");

        // returns a string representation
        String retval = d.toString();
        System.out.println("Value = " + retval);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Value = 5.3
```
