        Float f1 = new Float(1.0/0.0);
        Float f2 = new Float(0.0/0.0);

        // returns true if positive or negative infinity, else false
        System.out.println(f1 + " = " + f1.isInfinite());

        System.out.println(f2 + " = " + f2.isInfinite());
