

# JAVA.LANG.INTEGER.DOUBLEVALUE METHOD

[http://www.tutorialspoint.com/java/lang/integer\\_doublevalue.htm](http://www.tutorialspoint.com/java/lang/integer_doublevalue.htm)

Copyright © tutorialspoint.com

## Description

The **java.lang.Integer.doubleValue** method returns the value of this Integer as a double.

## Declaration

Following is the declaration for **java.lang.Integer.doubleValue** method

```
public double doubleValue()
```

## Parameters

- NA

## Return Value

This method returns the numeric value represented by this object after conversion to type double.

## Exception

- NA

## Example

The following example shows the usage of java.lang.Integer.doubleValue method.

```
package com.tutorialspoint;

import java.lang.*;

public class IntegerDemo {

    public static void main(String[] args) {

        Integer obj = new Integer(5);

        // returns the value of this Integer as a double
        double d = obj.doubleValue();
        System.out.println("Value of d = " + d);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Value of d = 5.0
```
