

JAVA.LANG.INTEGER.LONGVALUE METHOD

http://www.tutorialspoint.com/java/lang/integer_longvalue.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Integer.longValue** method returns the value of this Integer as a long.

Declaration

Following is the declaration for **java.lang.Integer.longValue** method

```
public long longValue()
```

Parameters

- NA

Return Value

This method returns the numeric value represented by this object after conversion to type long.

Exception

- NA

Example

The following example shows the usage of java.lang.Integer.longValue method.

```
package com.tutorialspoint;

import java.lang.*;

public class IntegerDemo {

    public static void main(String[] args) {

        Integer obj = new Integer(95545);

        // returns the value of this Integer as a long
        long l = obj.longValue();
        System.out.println("Value of l = " + l);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Value of l = 95545
```
