

JAVA.LANG.LONG.FLOATVALUE METHOD

http://www.tutorialspoint.com/java/lang/long_floatvalue.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Long.floatValue** method returns the value of this Long as a float.

Declaration

Following is the declaration for **java.lang.Long.floatValue** method

```
public float floatValue()
```

Parameters

- NA

Return Value

This method returns the numeric value represented by this object after conversion to type float.

Exception

- NA

Example

The following example shows the usage of java.lang.Long.floatValue method.

```
package com.tutorialspoint;

import java.lang.*;

public class LongDemo {

    public static void main(String[] args) {

        Long obj = new Long(97635);

        // returns the value of this Long as a float
        float f = obj.floatValue();
        System.out.println("Value of f = " + f);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Value of f = 97635.0
```
