

JAVA.LANG.LONG.INTVALUE METHOD

http://www.tutorialspoint.com/java/lang/long_intvalue.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Long.intValue** method returns the value of this Long as an int.

Declaration

Following is the declaration for **java.lang.Long.intValue** method

```
public int intValue()
```

Parameters

- NA

Return Value

This method returns the numeric value represented by this object after conversion to type int.

Exception

- NA

Example

The following example shows the usage of java.lang.Long.intValue method.

```
package com.tutorialspoint;

import java.lang.*;

public class LongDemo {

    public static void main(String[] args) {

        Long obj = new Long(57906);

        // returns the value of this Long as an int
        int i = obj.intValue();
        System.out.println("Value of i = " + i);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Value of i = 57906
```
