

JAVA.LANG.LONG.TOSTRING*LONGI* METHOD

http://www.tutorialspoint.com/java/lang/long_tostring_long.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Long.toString*longi*** method returns a String object representing the specified long **i**.

Declaration

Following is the declaration for **java.lang.Long.toString** method

```
public static String toString(long i)
```

Parameters

- **i** -- This is a long to be converted.

Return Value

This method returns a string representation of the argument in base 10.

Exception

- **NA**

Example

The following example shows the usage of java.lang.Long.toString method.

```
package com.tutorialspoint;

import java.lang.*;

public class LongDemo {

    public static void main(String[] args) {

        Long l = new Long(5);

        // returns a string representation of the specified long in base 10
        String retval = l.toString(76730);
        System.out.println("Value = " + retval);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Value = 76730
```
