

JAVA.LANG.LONG.VALUEOF METHOD

http://www.tutorialspoint.com/java/lang/long_valueof_long.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Long.valueOf** method returns a Long instance representing the specified long value **l**.

Declaration

Following is the declaration for **java.lang.Long.valueOf** method

```
public static Long valueOf(long l)
```

Parameters

- **l** -- This is a long value.

Return Value

This method returns a Long instance representing **l**.

Exception

- **NA**

Example

The following example shows the usage of java.lang.Long.valueOf method.

```
package com.tutorialspoint;

import java.lang.*;

public class LongDemo {

    public static void main(String[] args) {

        Long l = new Long(30);

        // returns a Long instance representing the specified long value
        System.out.println("Value = " + l.valueOf(27666));
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Value = 27666
```
