Declaration

Following is the declaration for **java.lang.Package.hashCode** method

```
public int hashCode()
```

Parameters

- NA

Return Value

This method returns the hash code computed from the package name.

Exception

- NA

Example

The following example shows the usage of lang.Object.hashCode method.

```
package com.tutorialspoint;

public class PackageDemo {

    public static void main(String[] args) {

        // get the java lang package
        Package pack = Package.getPackage("java.lang");

        // print the hash code computed for this package
        System.out.println("" + pack.hashCode());

    }
}
```

Let us compile and run the above program, this will produce the following result:

```
-888658374
```
