- **NA**

Example

The following example shows the usage of lang.Object.isSealed method.

```
package com.tutorialspoint;

public class PackageDemo {

    public static void main(String[] args) {
        try {
            // get the java lang package
            Package pack = Package.getPackage("java.lang");

            // check if this package is sealed
            URL url = new URL("http://www.tutorialspoint.com");
            System.out.println(" " + pack.isSealed(url));
        } catch (MalformedURLException ex) {
            ex.printStackTrace();
        }
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
false
```
