

JAVA.LANG.PACKAGE.TOSTRING METHOD

http://www.tutorialspoint.com/java/lang/package_tostring.htm

Copyright © tutorialspoint.com

Description

The **java.lang.Package.toString** method returns the string representation of this Package. Its value is the string "package " and the package name. If the package title is defined it is appended. If the package version is defined it is appended.

Declaration

Following is the declaration for **java.lang.Package.toString** method

```
public String toString()
```

Parameters

- NA

Return Value

This method returns the string representation of the package.

Exception

- NA

Example

The following example shows the usage of lang.Object.toString method.

```
package com.tutorialspoint;

public class PackageDemo {

    public static void main(String[] args) {

        // get the java lang package
        Package pack = Package.getPackage("java.lang");

        // print the package as a string
        System.out.println(" " + pack.toString());

    }
}
```

Let us compile and run the above program, this will produce the following result:

```
package java.lang. Java Platform APT Specification, version 1.6
Loading [Mathjax]/jax/output/HTML-CSS/fonts/TeX/fontdata.js
```
