

JAVA.LANG.STRING.TOLOWERCASE METHOD

http://www.tutorialspoint.com/java/lang/string_toLowercase.htm

Copyright © tutorialspoint.com

Description

The **java.lang.String.toLowerCase** method converts all of the characters in this String to lower case using the rules of the default locale.

Declaration

Following is the declaration for **java.lang.String.toLowerCase** method

```
public String toLowerCase()
```

Parameters

- NA

Return Value

This method returns the String, converted to lowercase.

Exception

- NA

Example

The following example shows the usage of java.lang.String.toLowerCase method.

```
package com.tutorialspoint;

import java.lang.*;

public class StringDemo {

    public static void main(String[] args) {

        // converts all upper case letters in to lower case letters
        String str1 = "Self Learning Center";
        System.out.println("string value = " + str1.toLowerCase());

        str1 = "www.photofuntoos.com";
        System.out.println("string value = " + str1.toLowerCase());
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
string value = self learning center
string value = www.photofuntoos.com
```
