

JAVA.LANG.STRING.TOUPPERCASE METHOD

http://www.tutorialspoint.com/java/lang/string_touppercase_locale.htm

Copyright © tutorialspoint.com

Description

The **java.lang.String.toUpperCaseLocale** method converts all of the characters in this String to upper case using the rules of the given Locale.

Declaration

Following is the declaration for **java.lang.String.toUpperCase** method

```
public String toUpperCase()
```

Parameters

- **locale** -- use the case transformation rules for this locale.

Return Value

This method returns the String, converted to uppercase.

Exception

- NA

Example

The following example shows the usage of java.lang.String.toUpperCase method.

```
package com.tutorialspoint;

import java.lang.*;
import java.util.*;

public class StringDemo {

    public static void main(String[] args) {

        String str1 = "This is Tutorialspoint";

        // using the default system Locale
        Locale defloc = Locale.getDefault();

        // converts all lower case letters in to upper case letters
        System.out.println("string value = " + str1.toUpperCase(defloc));

        str1 = "www.tutorialspoint.com";
        System.out.println("string value = " + str1.toUpperCase(defloc));
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
string value = THIS IS TUTORIALSPPOINT
string value = WWW.TUTORIALSPPOINT.COM
```
