

JAVA.LANG.STRINGBUILDER.APPEND METHOD

http://www.tutorialspoint.com/java/lang/stringbuilder_append_object.htm

Copyright © tutorialspoint.com

Description

The **java.lang.StringBuilder.appendObjectobj** method appends the string representation of the **Object** argument.

Declaration

Following is the declaration for **java.lang.StringBuilder.append** method

```
public StringBuilder append(Object obj)
```

Parameters

- **obj** -- This is an object.

Return Value

This method returns a reference to this object.

Exception

- NA

Example

The following example shows the usage of java.lang.StringBuilder.append method.

```
package com.tutorialspoint;

import java.lang.*;

public class StringBuilderDemo {

    public static void main(String[] args) {

        StringBuilder str = new StringBuilder("Compile ");
        System.out.println("string = " + str);

        Object obVal = "Online";
        // appends the Object value
        str.append(obVal);

        // print the StringBuilder after appending
        System.out.println("After append = " + str);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
string = Compile
After append = Compile Online
```
