

JAVA.MATH.BIGDECIMAL.PLUS METHOD

http://www.tutorialspoint.com/java/math/bigdecimal_plus.htm

Copyright © tutorialspoint.com

Description

The **java.math.BigDecimal.plus** returns a BigDecimal whose value is *+this*, and whose scale is *this.scale*.

This method, which simply returns this BigDecimal is included for symmetry with the unary minus method *negate*.

Declaration

Following is the declaration for **java.math.BigDecimal.plus** method

```
public BigDecimal plus()
```

Parameters

- NA

Return Value

This method returns the object value i.e this

Exception

- NA

Example

The following example shows the usage of *math.BigDecimal.plus* method

```
package com.tutorialspoint;

import java.math.*;

public class BigDecimalDemo {

    public static void main(String[] args) {

        // create 2 BigDecimal Objects
        BigDecimal bg1, bg2;

        // assign value to bg1
        bg1 = new BigDecimal("-123.126");

        // assign the result of plus method on bg1 to bg2
        bg2 = bg1.plus();

        String str = "The value of the BigDecimal is " + bg2;

        // print the value of bg2
        System.out.println( str );

    }

}
```

Let us compile and run the above program, this will produce the following result:

```
The value of the BigDecimal is -123.126
```
