Copyright © tutorialspoint.com

Description

The **java.util.Calendar.getMaximum** method returns the maximum value for the given calendar field.

Declaration

Following is the declaration for **java.util.Calendar.getMaximum** method

```
public abstract int getMaximum(int field)
```

Parameters

- **field** -- the calendar field.

Return Value

The method returns the maximum value for the calendar field entered.

Exception

- NA

Example

The following example shows the usage of `java.util.calendar.getMaximumfield` method.

```
package com.tutorialspoint;

import java.util.*;

public class CalendarDemo {

    public static void main(String[] args) {

        // create a calendar
        Calendar cal = Calendar.getInstance();

        // return the maximum value for days
        int max = cal.getMaximum(Calendar.DAY_OF_WEEK);
        System.out.println("Maximum days : " + max);

        // return the maximum value for months
        max = cal.getMaximum(Calendar.MONTH);
        System.out.println("Maximum months : " + max);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Maximum days :7
Maximum months :11
```
