```

Parameters

- NA

Return Value

The method returns the minimal days required in the first week of the year.

Exception

- NA

Example

The following example shows the usage of `java.util.calendar.getMinimalDaysInFirstWeek` method.

```
package com.tutorialspoint;

import java.util.*;

public class CalendarDemo {

    public static void main(String[] args) {

        // create a calendar
        Calendar cal = Calendar.getInstance();

        // get what the minimal days required in the first week of the year
        int i = cal.getMinimalDaysInFirstWeek();

        // print the result
        System.out.println("Minimal days required : " + i);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Minimal days required :4
```
