Copyright © tutorialspoint.com

Description

The **java.util.Calendar.getMinimum** method returns the minimum value for the given calendar field.

Declaration

Following is the declaration for **java.util.Calendar.getMinimum** method

```
public abstract int getMinimum(int field)
```

Parameters

- **field** -- the calendar field.

Return Value

The method returns the minimum value for the field entered.

Exception

- NA

Example

The following example shows the usage of java.util.calendar.getMinimum method.

```
package com.tutorialspoint;

import java.util.*;

public class CalendarDemo {

    public static void main(String[] args) {

        // create a calendar
        Calendar cal = Calendar.getInstance();

        // print the minimum value for years
        int min=cal.getMinimum(Calendar.YEAR);
        System.out.println("Minimum Years: "+ min);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Minimum Years: 1
```
