

JAVA.UTIL.CALENDAR.SETTIME METHOD

http://www.tutorialspoint.com/java/util/calendar_settime.htm

Copyright © tutorialspoint.com

Description

The **java.util.Calendar.setTimeDate** method sets Calendar's time with the given **Date**.

Declaration

Following is the declaration for **java.util.Calendar.setTime** method

```
public final void setTime(Date date)
```

Parameters

- **date** -- the given date

Return Value

This method does not return a value.

Exception

- NA

Example

The following example shows the usage of java.util.calendar.setTime method.

```
package com.tutorialspoint;

import java.util.*;

public class CalendarDemo {

    public static void main(String[] args) {

        // create a calendar
        Calendar cal = Calendar.getInstance();

        // get the current time
        System.out.println("Current time is :" + cal.getTime());

        // create new date and set it
        Date date = new Date(95, 10, 10);
        cal.setTime(date);

        // print the new time
        System.out.println("After setting Time: " + cal.getTime());
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Current time is :Wed May 02 20:33:17 EEST 2012
After setting Time: Fri Nov 10 00:00:00 EET 1995
```
