Declaration

Following is the declaration for **java.util.Currency.getCurrencyCode** method

```
public String getCurrencyCode()
```

Parameters

- NA

Return Value

This method the ISO 4217 currency code of this currency.

Exception

- NA

Example

The following example shows the usage of **java.util.Currency.getCurrencyCode** method.

```
package com.tutorialspoint;

import java.util.*;

public class CurrencyDemo {

    public static void main(String args[]) {

        // create a currency with eur code
        Currency curr = Currency.getInstance("EUR");

        // get currency code and print it
        String curCode = curr.getCurrencyCode();
        System.out.println("Currency Code is = " + curCode);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Currency Code is = EUR
```
