

# JAVA.UTIL.CURRENCY.TOSTRING METHOD

[http://www.tutorialspoint.com/java/util/currency\\_tostring.htm](http://www.tutorialspoint.com/java/util/currency_tostring.htm)

Copyright © tutorialspoint.com

## Description

The **java.util.Currency.toString** method returns the ISO 4217 currency code of this currency.

## Declaration

Following is the declaration for **java.util.Currency.toString** method

```
public String toString()
```

## Parameters

- NA

## Return Value

This method returns the currency's ISO 4217 code

## Exception

- NA

## Example

The following example shows the usage of java.util.Currency.toString method.

```
package com.tutorialspoint;

import java.util.*;

public class CurrencyDemo {

    public static void main(String[] args) {

        // create a currency with specified currency code
        Currency curr = Currency.getInstance("USD");

        // get the currency string and print it
        System.out.println("String representation:" + curr.toString());
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
String representation:USD
```
