Copyright © tutorialspoint.com

Description

The **java.util.Date.setTime** method sets this Date to show **time** milliseconds after January 1, 1970 00:00:00 GMT.

Declaration

Following is the declaration for **java.util.Date.setTime** method

```
public void setTime(long time)
```

Parameters

- **time** -- the number of milliseconds

Return Value

The method does not return any value.

Exception

- NA

Example

The following example shows the usage of java.util.Date.setTime method.

```
package com.tutorialspoint;

import java.util.*;

public class DateDemo {

    public static void main(String[] args) {

        // create a date
        Date date = new Date(92, 1, 10);

        // set the time for 10000 milliseconds after
        // january 1, 1970 00:00:00 gmt.
        date.setTime(10000);

        // print the result
        System.out.println("Time after setting: " + date.toString());
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Time after setting: Thu Jan 01 02:00:10 EET 1970
```
